MODULE

PROGRESS

<div><div>Intro to Academy</div></div>	<div>Introduction to Academy</div> <div>8 SectionsFundamentalGeneral</div> <div>This module is recommended for new users. It allows users to become acquainted with the platform and the learning process.</div>	<div>100% Completed</div> <div><div></div></div>
<div><div>Learning Process</div></div>	<div>Learning Process</div> <div>20 SectionsFundamentalGeneral</div> <div>The learning process is one of the essential and most important components that is often overlooked. This module does not teach you techniques to learn but describes the process of learning adapted to the field of information security. You will learn to understand how and when we learn best and increase and improve your learning efficiency greatly.</div>	<div>60% Completed</div> <div><div></div></div>
<div><div>Linux Fundamentals</div></div>	<div>Linux Fundamentals</div> <div>30 SectionsFundamentalGeneral</div> <div>This module covers the fundamentals required to work comfortably with the Linux operating system and shell.</div>	<div>60% Completed</div> <div><div></div></div>
<div><div>SQL Injection Fundamentals</div></div>	<div>SQL Injection Fundamentals</div> <div>17 SectionsMediumOffensive</div> <div>Databases are an important part of web application infrastructure and SQL (Structured Query Language) to store, retrieve, and manipulate information stored in them. SQL injection is a code injection technique used to take advantage of coding vulnerabilities and inject SQL queries via an application to bypass authentication, retrieve data from the back-end database, or achieve code execution on the underlying server.</div>	<div>64.71% Completed</div> <div><div></div></div>
<div><div>Web Requests</div></div>	<div>Web Requests</div> <div>8 SectionsFundamentalGeneral</div> <div>This module introduces the topic of HTTP web requests and how different web applications utilize them to communicate with their backends.</div>	<div>100% Completed</div> <div><div></div></div>
<div><div>Introduction to Networking</div></div>	<div>Introduction to Networking</div> <div>21 SectionsFundamentalGeneral</div> <div>As an information security professional, a firm grasp of networking fundamentals and the required components is necessary. Without a strong foundation in networking, it will be tough to progress in any area of information security. Understanding how a network is structured and how the communication between the individual hosts and servers takes place using the various protocols allows us to understand the entire network structure and its network traffic in detail and how different communication standards are handled. This knowledge is essential to create our tools and to interact with the protocols.</div>	<div>57.14% Completed</div> <div><div></div></div>
<div><div>Windows Fundamentals</div></div>	<div>Windows Fundamentals</div> <div>14 SectionsFundamentalGeneral</div> <div>This module covers the fundamentals required to work comfortably with the Windows operating system.</div>	<div>14.29% Completed</div> <div><div></div></div>

Introduction to Web Applications

17 Sections Fundamental General

In the Introduction to Web Applications module, you will learn all of the basics of how web applications work and begin to look at them from an information security perspective.

100% Completed

Getting Started

23 Sections Fundamental Offensive

This module covers the fundamentals of penetration testing and an introduction to Hack The Box.

100% Completed

Setting Up

9 Sections Fundamental General

This module covers topics that will help us be better prepared before conducting penetration tests. Preparations before a penetration test can often take a lot of time and effort, and this module shows how to prepare efficiently.
